How do I know if my prep is working after drinking the second half? Look at your stool!

- Your prep is working if the output is clear (able to see the bottom of the toilet bowl). The output may be yellow and clear like urine or a light orange and almost clear (no solid pieces).
- The prep may not be adequate and you should contact the office if the output is dark orange and somewhat clear or brown and murky (unable to see the bottom of the toilet bowl).
- Your procedure could be rescheduled or delayed if you are not prepped properly. If you are not sure that your prep is working, please call (541)779-8367.

Important Prescription Information

A prescription for Sutab has been sent to your pharmacy, please pick it up ASAP as the prescription at the pharmacy will expire and be invalid in about 7 days.

If Sutab is not covered by your insurance plan OR you determine that Sutab is too expensive, contact our office so we can review an alternative prep.

Post Procedure

- If biopsies are taken during your procedure you will receive a results letter in about 2 weeks.
- If normal, the doctor will inform you of that after the procedure and a copy of the report will be given to you at that time. A copy will also be sent to your primary care provider.
- If you are still having symptoms discussed at your consult appointment please call our office @ 541-779-8367 option 1 to schedule a follow up appointment.
- **For post procedure complications please refer to the instructions in the handout given to you by the facility.**
